So many people suffering from the feeling of not being good enough, also known as the Imposter Syndrome, have never recognised their own talents and successes which makes it impossible for them to make their unique contribution. In this webinar, the concept of the Imposter Syndrome is introduced in a way that helps individuals recognise the symptoms in themselves (70%) or others they are close to. You get to see the typical coping behaviours and understand the business and work benefits and consequences. Through case studies and personal experience, you will see how you can move beyond Imposterhood™ to discover and release the talented stranger within – for the benefit of all you associate with.
