3D Printing - What is it and why should I care?

3D printing is a relatively new but constantly evolving concept, gaining peoples' imagination and growing as an industry at a phenomenal rate.

Jorgen will touch on some of the benefits and roadmaps for the direction of the technology in the next few years, including ground-breaking advances in 3D printing for medical applications, industry and printing for the home hobbyist.

About Jorgen Collinson

With 15 years of experience in the Telecommunications industry and an Advance Diploma plus an Associate Diploma in Electrical Engineering, Jorgens passion lies in anything technology related.

Having developed an interest in 3D printing back when it was 'just a futuristic fad,' Jorgen has dedicated an enormous amount of time outside of his job to studying 3D Printing technologies; ones that are currently available as well as exploring where the future innovations of this technology can take us. After building his own 3D printer from scratch from a kitset, Jorgen is now looking to embark on more complex projects as the technology matures.
